

A LIVE-WIRE NEWSPAPER --- WITHOUT DOUBT THE BRIGHTEST AND BEST APPEARING COUNTRY WEEKLY PUBLISHED IN THE DOMINION OF CANADA

## GOVERNMENT FORTNIGHTLY CROP REP'T

Harvesting of Alberta's 1922 wheat crop has been commenced. Cutting of rye is practically completed throughout the province. Cutting of wheat has started at several points and will be general within another week.

Since the publication of the last report, rains which have fallen in many districts have improved the situation with respect to late grains and feed. The northern districts, hitherto lacking in moisture, have been favored with local showers, and a heavy 12-hour rain fell over the week-end, covering several northern districts. These rains will help the late grain to fill and will also add improvement to pasture and to feed crops. The situation in this respect is more encouraging than for some weeks. Showers have been fairly general over all the province during the past week.

While the very warm weather of the past week or two had a tendency to ripen the grain before it had properly filled, there is no reason at the present time to reduce estimates of yields made two weeks ago. In fact, late grain is filling better than expected, and yields are likely to show an increase over first estimates.

In the southern areas, rye cutting is completed, and the yields in this grain are averaging from 15 bushels in the dryer areas to 30 bushels in the more favored sections. The stands of wheat and oats in these areas, generally speaking, are heavy, and wheat will not be ready for the mower for another week, save in isolated spots.

In the central and northern areas, the wheat has ripened much faster, and harvesting has been under way for a week. Districts in these areas report conditions much improved over a fortnight ago, and the indication is for a better yield than was at first expected.

The first cutting of alfalfa in the south has been completed, and the yields have averaged about two tons per acre. The second cutting will be ready this week.

The province has been comparatively free from hail this year, damage being reported from only a few scattered localities.

Farm labor for harvest season is commanding \$3 a day, and labor for ordinary purposes on the farm is receiving at present, from \$50 to \$60 a month.

## What Co-operation Has Done For U. S. Farmers

It takes the thinking man, or the man who has calamity, to realize that the United States and Canada are both primarily agricultural countries, and that they cannot be prosperous unless agriculture is prosperous. Our American business men have suddenly awakened to the fact that in order for them to have prosperity they have to help the farmer to become prosperous. But the farmers of the United States are not asking the business men to do anything for them. They are asking the business men to step out of the way so that they can organize themselves, so they can do something for themselves and bring themselves up to the same plan of business organization that the ordinary industry now has.

When your business men and the people in the cities begin to realize that the farm problem is their problem, you are going to find a change in the type of agriculture and a change in the handling of the problems of agriculture. If the people of the cities refuse to recognize that their interests are inseparable from the interests of agriculture, it will hold your promise back and hold the whole of Canada back. Look at what happened in the United States. We were so very slow. Nearly every civilized country in the world has had co-operating marketing by the farmer for more than two generations. The United States and Canada happen to be the two backward ones. In countries like Denmark they have had co-operative marketing of farm products for more than fifty years. In the dairy industry more than 90 per cent. of their farmers are completely and co-operatively organized, and in poultry and livestock they are organized to the extent of over 85 per cent. In Germany, France, Australia,

Italy, Switzerland, even in Russia and Rumania the growers have learned how to co-operate, not merely to co-operate in credits and other types of problems. But for years the United States and Canada, nations that are characterized by strong individuality, stood back and let the Danish farmers take the cheese market away from the Ontario farmers, although the Ontario farmers boast that they produce the best cheese in the world.

What Happened in the Cotton Industry. Take what happened in the cotton industry. We have in the U. S. an industry by which we produce two-thirds of all the cotton in the world, a staple non-perishable article giving us what would amount to a commercial monopoly of this high type product. We have been producing it for a decade or more in the same districts. You would imagine that these farmers must have made some money because the men who sell you cotton goods get a fairly good price, and you have heard of cotton exchange millionaires and mill men who have left enormous fortunes for their children. Cotton has probably always meant wealth to you. I would like you to see the cotton farmers. There are several millions of them in the southern section of the United States and they live in a stage of poverty such as you never dreamed of—a stage two generations behind what you have here in the city of Toronto. You can go to South Carolina and see homes where the whole family lives in one room where perhaps for the whole year no one has a pair of shoes or stockings; where they have to take the little children and put them out to work in the field and cannot give them any schooling. There are districts where the whole country cannot raise enough in taxes to put in a decent road or a school, or put up a decent church; where to family after family all their days are passed in gloom and hopelessness; where tenantry is increasing, where the standard of living is going down. And yet these very people are producing one of the greatest agricultural crops of the world which makes millionaires every single year in New York, in New England and in old England. You would think it a most amazing thing to realize that the average family income in South Carolina, in producing cotton is less than \$300 a year, including the higher war years, for the last ten years. It is the most amazing thing I have ever known in my life to realize how this great and valuable crop, one of the greatest on the North American continent, can create so much wealth, can take so much out of the consumer and leave so little, either in money, in happiness or in decency of living for the man who primarily created that wealth.

Now, in the United States we have been stung into the necessity for studying that problem. We have seen the population moving from the country to the city, and the 1920 census showed for the first time that the urban population of the United States was greater than the rural population. Young men and women will not stay on the farms because it not only does not pay them anything, not to speak of wholesome recreations or anything that means ordinary comfort. They will go anywhere except stay on the farm. Tenantry is increasing all over the United States, and in this day when we boast about our freedom we have to recognize the fact that the drift in that country is toward a system of practically feudal farming. In addition to that the standards of living are going down in the farming districts instead of going up.

You must not think that because a large number of American farmers own Fords that they have automobiles in the sense that city people have. The Ford of the farmer is simply his street car, his public utility. The farmers are separated and in order to get around they must have some kind of a wagon or some kind of a Ford. Do not think that because Ford can sell cars to a great many farmers in the United States that the farmers in that country are living on a high plane. Much more than one-half of the farmers in that country are living on a plane which is at least one generation below the plane of the average trained worker in the small American cities. That is the situation in the United States, and I speak of the United States because I know more about it, and not because the United States exclusively has that problem or has that situation to face.

## CAPITAL GOSSIP AND PROVINCIAL NEWS

Members Tour the South  
Members of the legislature from Northern Alberta constituencies, headed by Hon. Geo. Hoadley, Minister of Agriculture, and accompanied by newspaper representatives and others, spent three days last week touring the grain fields and irrigation districts of Southern Alberta. The party left Monday evening, going by train to Nanton. From that point the party travelled in autos, making stops at Stavelly, Claresholm, Macleod, Cardston, Lethbridge, Vauxhall, Medicine Hat. During the trip the party saw magnificent crops on both dry and irrigated land. The uniform excellence of the crops throughout the greater part of the south this year impressed itself upon the visitors. A stop was made at the Stavelly fair, and at the Agricultural School at Claresholm. At Macleod the party was banquetted, also at Cardston, Lethbridge and Medicine Hat. The party visited the headquarters of the United Irrigation Project near Cardston, and also saw some of the construction work on the Lethbridge Northern project. In the Coalville district and at Vauxhall, the party was able to see what can be accomplished by irrigation. Next year it is probable that the contemplated tour of the north country will be held.

Restaurants Must Have Licenses  
Something like fifteen hundred licenses have been issued to restaurants, soft drink bars, lunch rooms, etc., by the license branch of the Attorney General's Department up to the present time, but according to reports of the inspectors of the department there are still a very considerable number who have failed for one reason or another to take out their license. Officials think there may still be some misunderstanding as to the requirements of the Act and that some may not appreciate the fact that under the terms of the Act, Section 2 (a), a Restaurant is defined as, "any building, house, store, booth stall or erection whatsoever used for the purpose of the business of selling food or drink to be consumed in or about the premises where the same is sold, and without restricting the generality of the foregoing, includes every refreshment house, public dining room, public lunch room, public tea room, ice cream parlor, buffet and soft drink bar."

The Miners' Strike  
A conference of miners' officials and operators was held during the past week at the instance of Premier Greenfield, to review the strike situation, but nothing definite was accomplished, although tentative offers of settlement were made. In view of the coal shortage in the east and in the western states, a busy season is anticipated for the mines in Alberta, as soon as the present controversy is settled.

Liquor Law  
A survey of conditions throughout the province in connection with the enforcement of the liquor laws has been completed by Inspectors Downey, Follis and Rudd, who have reported on the results of their investigations in sixty-seven typical communities, from Rocky Mountain Park and Vermilion, to Medicine Hat and the Crow's Nest. In submitting a summary of this report to the Attorney-General, E. S. Bishop, liquor act commissioner, points out that the general trend of the inspectors' findings is that the law is now being better enforced than ever before, is more generally respected and is increasing its hold upon the sympathy of the public. Special attention was paid during the survey to drug stores, billiard rooms and restaurants, over 500 establishments of these three kinds having been investigated.

Drought Relief Act  
Approximately ten per cent of farmers in the drought area in the south have taken advantage of the Drought Relief Act, according to a statement made by Commissioner E. J. Fream. This has meant the opening of 2000 files since June 26 last, when the commissioner began his work. Altogether he expects that there will be about 2500 files opened. "I believe the peak has been passed," Mr. Fream remarked, "and we will now have a chance of dealing with these files so that adjustments may be recommended."

Bond Issue  
Preparations are now being made by the provincial treasury department for a new debenture issue some time this autumn. The province has \$5,000,000 of 4 per cent. sterling debt.

English people had done in a co-operative way. They soon learned that you cannot have the same kind of co-operation in a producing country that you have in a country that is chiefly a consuming one. Some started the consumers' stores, that they might make tiny savings in purchases; but we have learned that consumers' stores are just scratching the problem. The chief thing is to give the farmer a purchasing power so that he stands in the same position as others and can buy in the markets of the world at a fair price. So we started out under the Rochdale system of consumers' stores and failed. We had hit on nothing fundamental. Some of the farmers who had heard about Denmark's experience began to think whether that system could be adapted to Cal-

Prosecutions recently undertaken by the theatres and amusements tax

Howard Stutchbury, coal trade commissioner for Alberta has been authorized by Premier Greenfield to make a thorough investigation and to secure all available data on the manufacture of potato by-products with the object in view of assisting the potato growers of Alberta in finding some means of disposing of a profit of their second grade and cull potatoes. While there is a good demand for all of the first class potatoes grown in the province, the potato growers feel that the success of the industry depends entirely upon finding an outlet for the lower grades.

## CAPITAL GOSSIP AND PROVINCIAL NEWS

Members Tour the South  
Members of the legislature from Northern Alberta constituencies, headed by Hon. Geo. Hoadley, Minister of Agriculture, and accompanied by newspaper representatives and others, spent three days last week touring the grain fields and irrigation districts of Southern Alberta. The party left Monday evening, going by train to Nanton. From that point the party travelled in autos, making stops at Stavelly, Claresholm, Macleod, Cardston, Lethbridge, Vauxhall, Medicine Hat. During the trip the party saw magnificent crops on both dry and irrigated land. The uniform excellence of the crops throughout the greater part of the south this year impressed itself upon the visitors. A stop was made at the Stavelly fair, and at the Agricultural School at Claresholm. At Macleod the party was banquetted, also at Cardston, Lethbridge and Medicine Hat. The party visited the headquarters of the United Irrigation Project near Cardston, and also saw some of the construction work on the Lethbridge Northern project. In the Coalville district and at Vauxhall, the party was able to see what can be accomplished by irrigation. Next year it is probable that the contemplated tour of the north country will be held.

# THE EMPRESS THEATRE CURRENT ATTRACTIONS

## STRONG DRAMA OF REGENERATION IS GOLDWYN'S "THE INVISIBLE POWER"

House Peters and Irene Rich Play Leading Roles in Story by Charles Kenyon, directed by Frank Lloyd.

Rarely in the history of underworld stories of the screen has such a vivid tale of regeneration found so excellent an ensemble of forces as those that produced "The Invisible Power," by Charles Kenyon, which will be shown at the Empress Theatre, for two days, commencing Wednesday next.

This Goldwyn picture was directed by Frank Lloyd, with a flawless cast, headed by House Peters and Irene Rich. Mr. Peters is well known for his virile and sympathetic characterizations. In "The Invisible Power," Mr. Peters makes his bow as a Goldwyn player. Miss Rich has appeared in many photoplays as leading woman for Will Rogers. In the short space of three years, she has developed from an "extra" to the position of leading woman.

Charles Kenyon, the author of the famous stage play, "Kindling," wrote "The Invisible Power." If there is any moral to be gleaned from this powerful emotional drama, it is that it little befits the best of us to point the finger at the worst of us. The story itself deals with the regeneration of an underworld character and the sacrifices that his wife, the school teacher daughter of a minister, makes to help him "go straight." The very fact, however, that he has once been in jail, keeps him constantly under the surveillance of the police; so much so that even his wife becomes enmeshed in the politics of the secret police that watch the activities of famous underworld characters.

The story is not only logical and consistent, but the plot develops into a personal drama of self-sacrifice on the part of the ex-convict's wife that every mother and every father will sympathize with and condone. Both Irene Rich and House Peters have won new laurels for their fine performances in "The Invisible Power."

Frank Lloyd, the director, has again demonstrated his ability to handle a story with several involved plots and

keep them all running smoothly without any confusion resulting in the minds of the observers. His direction of several scenes involving the secret police, reveal an accurate knowledge of their activities. The production is unstinted and excellently mounted.

Among the well known players in "The Invisible Power," are DeWitt C. Jennings, who has appeared on the Broadway stage for many years, Sydney Ainsworth, Lydia Yeamans Titus, Jessie de Jannette, William Friend and Gertrude Claire.

## MAYO PLAYS POWERFUL ROLE IN RUGGED DRAMA

Universal Star Has One of Best Parts of His Career in New Film

A rugged, outdoor story portrayed by rugged outdoor men is coming to the Empress Theatre on Friday and Saturday, when "Out of the Silent North," a Universal production with Frank Mayo in the leading role, will be the chief attraction. There probably is no more virile character on the screen than Frank Mayo, nor any man who knows and loves the great outdoors more than William Worthington, who directed this production. "Out of the Silent North" is a clean wholesome story of the "snow country," powerful in its simplicity.

The cast includes some of the most talented players of film. Those in principal parts are Barbara Bedford, Lionel Belmore, Frank Leigh, Harris Gordon, Christian J. Frank, Frank Lanning, Louis Rivera and Dick LaReno.

The story concerns a young French-Canadian, Pierre Baptiste, living in a far outpost of civilization in northern Canada, and loving Marcette, daughter of the store-keeper there. A stranger comes, a polished gentleman of the outside world, whose gentility turns the head of pretty Marcette. He sets off to find a gold claim and the girl asks Pierre to go along and see to his welfare. Pierre goes for her sake, though his heart aches with the thought that she loves another. The simple frontiersman's loyalty to the other man through many dangers and

many weary months of toil show the girl the nobility of his nature and make her realize that she loves only Pierre. The simple story is eloquently told in "Out of the Silent North."

## "ROOM AND BOARD" IS CONSTANCE BINNEY'S MOST LAVISH PICTURE

"Room and Board," in which the Realart star, Constance Binney, will next be seen, is said to be the most lavish production in which she has ever appeared.

The story concerns the fortunes of an Irish noblewoman, Lady Noreen of Kildoran, whose father, a genial spendthrift, had always followed a deliberate policy of putting off the debts and worries of today until some vague tomorrow. The castle is growing shabby and the estate has gone to seed; few servants remain and mortgagees threaten to take the little that is left. But so long as he has his fox hunting and his today, the Earl is content.

The Earl is killed in the hunting field, and the rest of the story deals with Lady Noreen's gallant fight with debts and worry, her leasing of her ancestral castle to a wealthy American, and her own pretense that she is one of the castle servants left in charge by the absent Lady Noreen.

The settings for castle and Irish village, the fox hunt in which the old Earl loses his life, the castle interiors, furnished with fine examples of antique furniture, are all done on an elaborate scale, making "Room and Board" the most expensive as well as the most beautiful picture in which Realart has ever presented Miss Binney.

The role of the spirited little Irish heroine is one well suited to Miss Binney's personality and she is said to give a remarkably sympathetic performance as Lady Noreen.

Manager Cutler, of the Empress, has booked "Room and Board" for two days, beginning next Monday. Also showing two-reel comedy "Peggy Be Good."

## BEST ATHLETE IN COUNTRY CLAIMS BOXING AS HOBBY

George Walsh, athlete extraordinary and co-star of "With Stanley in Africa," a chapter photodrama portraying the daring expedition into the heart of the Dark Continent to rescue Dr. Livingstone in 1871, being shown at the Empress Theatre on Friday and Saturday of each week, is a real product of the gymnasium, field and track. Although he is called upon to exert his athletic prowess every day in the studio, he claims that his chief hobby is putting himself through his paces on the gym floor and on the athletic field.

He played football (all positions) with Fordham University and was the sensation of the East with his toe-prowess, personally being responsible for victories over Princeton, Cornell, Syracuse, Georgetown and Rutgers. He out-fought for the Brooklyn Nationals in 1914; was heavyweight boxing champion of Fordham and Georgetown Universities; rowed stroke oar on the championship N. Y. A. C. eight, and was champion all-around track athlete under the tutelage of Bernie Wefers, Sr. His trainer is Jake Weber, who for twelve years has trained the U. S. entries in the Olympic games.

He has fought several exhibition boxing bouts with some of the ranking pugilists. Among his opponents have been Jack Dempsey, present title holder of the World's Heavyweight Championship, and Philadelphia Jack O'Brien. "With Stanley in Africa" is his first venture with Universal. He has many successes to his credit as a Fox star, both in the serial as well as the five-reeler field.

## CONSTANCE BINNEY AS IRISH HEROINE

As a spirited young Irish noblewoman Constance Binney has a splendid role in "Room and Board," her latest Realart picture, which will open next Monday at the Empress Theatre for a two day run. Also showing two-reel comedy "Peggy Be Good."

## HOUSE PETERS ACTS LEAD IN GOLDWYN PHOTOPLAY

House Peters, who plays the leading male role in "The Invisible Power," a Frank Lloyd Production, which comes to the Empress Theatre, for two days, commencing Wednesday next, was born in Ireland, South Africa, Australia, Canada, Cincinnati and New York City, according to various reports. The truth is Mr. Peters was born in Bristol, England, and at a very early age migrated to Australia, thence to the United States. As a young man he went on the stage and was starred in many great plays. Later he came West and entered pictures. He is one of the screen's highest salaried leading men. This is his first appearance in Goldwyn films.

## NOTES

Frank Mayo has won a niche in the cinematic Hall of Fame by being a man's man. The success of his pictures does not depend upon sartorial elegance or lavish settings. This is brought out more strongly than ever in his latest Universal offering, "Out of the Silent North," which comes to the Empress Theatre, Friday and Saturday. It is a tale of the Canadian Northlands with Nature's rugged beauty as a background. Those who have seen the picture declare it one of the best in the Universal star's career.

Barbara Bedford, as an unsophisticated, lovable little flower of the North, is being highly praised by critics for her work in support of Frank Mayo in "Out of the Silent North," which comes to the Empress Theatre Friday and Saturday. Miss Bedford is pretty and unaffected. Her natural demeanor on the screen is her greatest charm. Her part in the coming Universal attraction is one of the best she has ever had.

and 85 explicit answers couched in plain, straight-forward language, regarding the Accredited Herd system and the identification, prevention and eradication of tuberculosis; also relative to the requirements of and provision for official inspecting and testing. The primary principle for the prevention of tuberculosis, or for that matter any other disease of live stock, is cleanliness, accompanied by free ventilation and plenty of light; and the first element in sanitation is cleanliness. That this is a prime consideration is indicated by the statement that the officially appointed inspector will not undertake to test a herd for tuberculosis until he is assured by personal observation that the premises are clean and sanitary. Besides details of the provisions made for Government testing, explanations are given in the question and answer form regarding a variety of matters, including municipal testing and the classification of dairies, testing by private practitioners with departmentally supplied tuberculin, and the ways in which swine and poultry are liable to become infected with tuberculosis.

## A TRAVELLERS' IMPRESSIONS.

A journey from Winnipeg to Vancouver, a distance of 1500 miles, provides many scenes of interest. At this time of the year the country presents a rare sight to lovers of nature. As far as the eye can traverse, large fields of rapidly ripening grain wave in the breeze, bidding, as it were, a welcome to newcomers. At the different stations, especially in the mountains of B.C., the observant traveller is faced with typical pictures of western life. From the smartly dressed R. C. M. Policeman with his attractive red

tunic, to the rough, but always interesting cowboy; the miles of dense forest stretching on the slopes of massive mountains with their constant water-falls feeding the rivers below in their onward rush to the sea, create not only a passing interest, but leave an indelible impression upon the thoughtful mind as it realizes "the builder and maker is God."—War Cry.

"We cater to tourists—lobsters our specialty," says a sign on a Cape Cod hotel.

## EMPRESS PROGRAMME

### FRIDAY & SATURDAY

FRANK MAYO  
in  
"OUT OF THE SILENT NORTH"  
GEORGE WALSH and  
LOUISE LORRAINE

Mrs. E. Young, Miss Nichols, Mrs. A. E. Skelding and Mr. H. Young, spent the week end at Waterton Lakes.

MEETS. Wilfred and Lester Porrin, and Mr. V. Goe have spent the past two weeks at Waterton Lakes.

## Red Cross Notes

Mrs. C. B. Waagen, Vice-president Provincial Branch R.C.S., has returned from her tour of inspection in the north, and has much of interest to report of the activities of the various Red Cross branches. The Rife branch has now completed arrangements for the new Red Cross Nursing Station. They are putting up the nurse's residence which will be able to accommodate two patients in emergency cases where they cannot be treated at home. The Provincial Government will supply the nurse in charge, and the Red Cross will assist in supplying the attendant who will be chosen from amongst the Russian girls of the district. The Rife settlement is a large, and very scattered one, and here will be seen the first instance of the complete working arrangements of the government and the Red Cross in the provision of nursing care.

At St. Paul de Metis the Red Cross committee has been doing excellent work, especially during the winter and early spring in connection with relief work for their district. They are now arranging for a Health Demonstration at the fair in September, which will be in the nature of a Child Welfare Exhibit with Diet-table, baby outfits, etc. In the near future St. Paul de Metis hopes to secure a hospital for their district.

Smoky Lake Junior Red Cross Society has made a name for itself by winning the Lieutenant-Governor's medal in connection with the new Red Cross Hospital in Calgary.

In the district between Bonnyville and Smoky Lake there are many foreign families where it was found that several of the children were in need of medical and nursing care. It is hoped that arrangements now on hand will enable these cases to be admitted in the near future to the Junior Red Cross Hospital in Calgary. It is probable that the Bonnyville Branch will arrange to have on hand Emergency Pouches, fitted with First Aid requisites also Red Cross supplies for use in emergency in the outlying districts. Health Literature of an educational type will also be distributed at this point.

## SUDDEN DEATH.

Saturday morning, August 12th, at the farm of Mike Cain, 16 miles south of Macleod, William J. Carr died suddenly. He had gone to this farm to help in the harvesting, and was repairing some of the machinery. He complained of not being well, but took his meals in the house with the other men. Friday night he did not go to supper, so it was taken to him. Saturday morning Mr. Carr went to call him at 6:30 a.m., and getting no answer, went into the shack and found him dead. Coroner Grady was called. He was accompanied by Dr. Kirk. The body was still warm. After examination they decided an inquest was not necessary, as the deceased had died of heart failure. The funeral took place in Macleod on Sunday, August 13, under the direction of the Masonic order, of which deceased was a member.

## GARDEN OF EDEN ON RIM OF THE ARCTIC.

Out of the north come many wonderful tales, but not many that rival the story told by Frank Perry, mining engineer, of Vancouver. He has spent fourteen years in the Arctic regions of the North-West, between latitudes 57 and 63, and longitudes 122 and 131. He travelled light, using only four pack dogs, and made his food from concentrated extracts of moose meat. Being far from the usual run of river and lake traffic, he came into touch with only a few Indians, and even these had superstitions that kept them out of the great valley into which he accidentally wandered. This garden is a Garden of Eden, a sort of semi-tropical Paradise surrounded by Arctic rigor, and is wonderfully rich.

## Hot Spring Valley.

Perhaps the most striking part of his story is the discovery of the Hot Spring Valleys, in all, 200 miles in length and from 25 to 40 miles wide. Struggling up the side of a hill, with his two faithful dogs, with an Arctic gale chilling his almost exhausted constitution, he found when at last reaching the crest, this wonderful valley, the bottom of which was hidden from his gaze by a dense fog, the origin of which he at first was unable to understand. When he descended he found large lakes of almost boiling water, generating clouds of vapor, which forming the fog, protects the valley from the frosts and fosters vegetation. The soil is the richest he knows of, probably 100 feet deep with natural fertilization from the hot springs and volcanic minerals. In this valley Mr. Perry found large deposits of minerals with a high percentage of gold, silver and copper. He has sent a large number of samples of these deposits to be analyzed in various American universities, and he has in his possession documents showing the chemical composition of the finds.

## Growth Tremendous.

The vegetation was exceptionally rich, not only in different forms, but

are the fur traders and they always use the rivers and waterways as means of transportation. I have met a few Indians, but have found they nurse a tradition that the valley is haunted by what we know as pre-historic animals. By a discovery I found out the origin of their fantastic belief.

Three-toed Monster.

"This part of the country has not been exposed to the destructive forces of glaciers, and I was not astonished to find footprints in sandstone of a three-toed monster. I also saw a number of bones of immense size, in remarkably preserved condition, north and west of the Findlay river. The bones are not fossilized and those exposed to daylight are sections of the spine and the hips." By excavation Mr. Perry thinks that a find would be of much historic value. It is only in 1 valley that the engineer has seen signs of the muscular monsters which ruled the world thousands of years ago, and the situation of the remains suggests that some natural disaster closed them in this valley and drowned them. The creek, which has in modern time been flowing through the valley, has in its erosional action exposed the giants. Mr. Perry was from early age made familiar with the mining conditions in Montana and Idaho. He has always studied geology and the vast open spaces in the North were always the fields on which he used to let his imagination play in younger days. He is now through with the foundation work of his scheme.

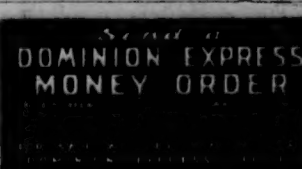

A despatch says that many infants, at the close of each Derby, are named after the winning horse. To allot them names hurried at the losers would, of course, be apt to cause family embarrassment.

Recent Washington figures show that among our neighbors 1,900,000 men and women, over 45 years of age,

are the fur traders and they always use the rivers and waterways as means of transportation. I have met a few Indians, but have found they nurse a tradition that the valley is haunted by what we know as pre-historic animals. By a discovery I found out the origin of their fantastic belief.

are unmarried. For them the proper name of the country should be "Dis-united States."

Across the border the latest plan for shipping liquor is in water me'ons. Just think of the chagrin of the man who purchases one and finds the water designation a misnomer!

## A HARVEST SONG.

Come out to the dance of the harvest fields,  
Leave warehouse and shop and street,

Away where the berries nod and glow,  
And the wind blows fresh and sweet.  
Come out to the fields where the graceful rye  
Is doing a minuet,

That the fence rail plays, while the merry wind  
Thrums on his bark guitar,  
The crows beat time with their flapping wings  
As they call to their mates afar.

The sunflowers don their golden gowns  
The corn wears its stately plume  
The fields are holding the carnival  
They arranged in the month of June.

Come to the dance of the ripened wheat,  
Leave care in the city's thrall,  
Bring laughter gay, and thankfulness  
The fields hold carnival.

—Lillie A. Brooks.

## WHETHER IT HITS OR MISSES, IT IS A GOOD STROKE.

Some of the most influential British newspapers question the wisdom of the Foreign Office's debt cancellation note. They fear that it will produce in the United States an effect the very opposite of the one desired. Do these criticisms throw any new light on the matter? The answer of the Foreign Office to that question would undoubtedly be in the negative. There is nothing in the faultfinders' objections that would not be before the mind of the Earl of Balfour when he was preparing the note. We doubt that he had considered every one of the possibilities that have been pointed out to him in the last two days. He weighed them and decided that they were not substantial enough to turn the scales against the advisableness of sending the note. We believe that in assuming the United States would take the note in the right sense he did more justice to that nation than his critics do in assuming that the note will cause annoyance to it. That the Washington Government will immediately respond to that note with an offer to relieve Britain of her liability for war loans raised in the United States, we grant, hardly to be expected. But what the United States might be unwilling to do now it might sometime in the future feel under a moral obligation to do. Very many of its citizens would today admit that the money Britain thus raised for the Entente Powers' warring purposes took the place of resources that the United States ought to have been contributing in the first two or three years of the war instead of remaining neutral all that time. We believe that the United States Government will have the fairness to admit that the Balfour note is the first really statesman-like and business-like proposal for clearing away the one

WHEN USING  
**WILSON'S  
FLY PADS**  
READ DIRECTIONS  
CAREFULLY  
FOLLOW THEM  
EXACTLY

## There is only one way to kill all the Flies

**This is it—Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water but not flooded) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below.**  
Put the plates away out of the reach of children until required in another room.

## The right way to use Wilson's Fly Pads

formidable obstacle to the return of credit to the war-stricken and stagnant nations of Europe. Conferences have proved futile. It would be a very happy outcome of Lord Balfour's overture if the United States were to step out of its insularity and with Britain make a bonfire of all the mortgages the two powers hold against nations that fought against Germany in the war.

## THE GOVERNMENT CONVERSION SCHEME

The attention of the holders of the five and a half per cent. war loan bonds maturing December 1, 1922, is directed to the offer of the Minister of Finance to renew the loan on favorable terms. The last Canadian loan was placed in New York at a satisfactory price. The Minister is making his present financial operation entirely a domestic one by offering to exchange the maturing bonds for new bonds bearing the same rate of interest, running for either five or ten years as the bondholder may prefer. A further inducement to the investor is that he receives a bonus of one month's interest. The terms offered are decidedly favorable to the investor and it is probable that a large part of the maturing loan will be renewed. Arrangements for the exchange of the bonds can be made at any branch of the chartered banks. Holders who do not wish to reinvest will be paid in cash on the 1st December.

The Chautauqua at Macleod this year did not attain to the standard of this public's expectations in many respects—in fact, apart from the lectures, much of the amusement program might honestly be termed mediocre.

## LONDON'S GREAT RAILWAY TERMINUS.

The architectural treatment and planning of the important railway terminal of London have frequently been severely criticised, and with one or two notable exceptions, it certainly cannot be urged that these structures are worthy of the greatest city in the world.

Such a state of affairs is mainly due to the neglect, in days gone by, of systematic town-planning, which permitted cities and towns with their suburbs to expand in a go-as-you-please fashion, with regard only to the requirements of the moment and with very little, if any, concern as to the future development of each district, and even each separate thoroughfare.

as part of the whole of a well-considered plan. As a consequence of this short-sighted policy of the past, any big improvement or rebuilding scheme in an established town area is fraught with innumerable obstacles which are difficult and costly to successfully overcome.

A great reconstruction scheme, that has been in progress for about twenty years and has just been completed, provides London with a wonderful railway terminus of which it may be justly proud. The new "Waterloo," at which so many visitors from overseas obtain their first impressions of the capital of the British Empire, is a huge and well-arranged station, planned and equipped on modern lines, with every accommodation for the convenience and comfort of the travelling public.

The directors of the London and South-Western Railway Company obtained Parliamentary powers in 1900 to enable them to demolish the hopelessly and ill-arranged collection of railway lines, administrative buildings, rooms—totally inadequate for their purpose—and out-of-date train sheds, which had gradually accumulated to form the old "Waterloo," and a commencement was almost at once made with the construction of the new terminus, which now covers an area of nearly twenty-five acres.

The work had to be planned and executed from the first in sections so as to obviate the dislocation of railway, road and foot traffic. When it is stated that an average total of 1,300 trains are entering and leaving the station every 24 hours, the magnitude of this task will be better realized.

The new station comprises 23 platforms as against three in the first platform erected on the site. Eight lines of metals, by which the terminus is approached, gradually spread to about thirty within the station itself.

Public entrance to the main booking hall and offices is gained from an approach road that extends along the entire street frontage. A remarkably fine circulation area or concourse is provided between the main building and the platforms, to which it gives easy access.

Each platform is clearly numbered, and the most modern of indicating devices make it a very simple matter for the public to ascertain the departure and arrival platforms of the various trains.

The huge concourse and platforms are covered by a lofty glazed roof, in the construction of which has been embodied specially designed ventilating gear allowing all smoke and steam from locomotives to be rapidly dispersed.

The roof is planned in bays, each of about 60 ft. span, and the steel roof principals are carried on intermediate steel columns of 35 feet or so in height.

The office buildings extend along the entire length of the concourse, and provide accommodation at the platform level for two large booking halls at north and south ends respectively, ample waiting rooms, dining and tea rooms, and public bars. Station administrative offices are also provided at this level, including station-master's department, lost property office, time and pay office, messrooms, etc., for railway workers of all grades.

On the upper floors are housed the official and clerical staff, and the accommodation includes large staff mess rooms and kitchens.

The public lavatories, baths, hair-dressing saloons and cloak-rooms are placed on a mezzanine floor between the street and platform levels.

The buildings are of steel-framed construction throughout, encased with brickwork and Portland stone. Among the noteworthy structural features of the new building are the great steel-framed and slatted screens at the north and south flanks of the concourse. Each of these screens consists of five separate bays 120 ft. wide, and one bay of 80 ft. in width.

A number of the principal platforms are connected by short flights of steps to a subway leading to underground tube railways, while a lower subway is provided for dealing with the parcels and baggage traffic, it being connected with the platforms by electric goods lifts. This latter arrangement greatly reduces the possibility of congestion of traffic in the public concourse, and is especially convenient during rush periods.

The marshy and unreliable nature of

the subsoil of the site has made it necessary for the utmost care to be taken in foundation work. The new station is carried on arches with a height of some twenty feet above general ground level, and portions of the foundations have been taken down to twenty feet below ground level.

The architectural treatment of the principal facades is a bold and dignified character. A prominent feature has been made of the northern entrance to the station, into the design of which has been embodied a magnificent memorial archway, erected by the company in memory of those of their employees who were killed in the war.

The "Victory Arch" was designed by the chief architectural assistant to the London and South-Western Railway Company, Mr. J. R. Scott. Its frontage is set back a little from the plane of the general elevation, and the arch, which is in Portland stone and has a span of 28 ft., is approached by a fine flight of masonry steps. Underneath the label moulding occur a series of decorative carved panels with war trophies, and the names of the various countries where the men fought are carved upon stone shields.

## AIRPLANE TRAVEL DECLINED IN 1921.

During the war period, everyone fully expected that Canada would organize and maintain a large military and civil air force and equipment after the war. Our great spaces lend themselves to aerial exploits. The need of communication over great distances now not covered by railway or telegraph, and not likely to be so located in that locality, covered for decades, has been patent.

The aerial corps was expected to supply the need. The co-operation of the Dominion Air Board, operating under the Department of Militia, and the provinces, in organizing regular mail routes in the North-West was looked for. In some isolated cases work of this type has been done, but aviation under the Air Board has not by any means reached the vigor and distribution that the circumstances suggested.

Less Money Provided. The Dominion estimates for 1922-23 for Air Board purposes were cut by about \$600,000, to \$1,600,000. But as buildings, machines, etc., are on hand, the operations are not greatly curtailed. The number of young pilots to be trained has been reduced, and university cadet training this season is postponed. The chief effect of the reduction in the estimates is the inability to get new machines of modern type. The season's program of the Air Board includes training at Camp Borden; flying operations from Vancouver and High River; in the Lake Winnipeg district from a main base at Victoria Beach, and subsidiary bases at Le Pas and Norway House; and at Ottawa. Operations on a repayment basis for the Ontario, Quebec and British Columbia Governments are expected. The first will be a practical test on a large scale of airplane forest protection. This is to be carried out from Whitney, with a sub-base at Parry Sound. The Ontario Government is deeply interested, and is giving thorough co-operation to make a test of the practical efficiency of airplane patrols of forests. For the Quebec Government, a station at Roberval is established, and used as a base for fire ranging by airplane. The Vancouver station is also used for fire ranging, and the work in this case is of special difficulty, owing to the air holes caused by winds travelling over so many mountain peaks.

Effects of Hard Winter. The Air Board has had in hand special tests relating to airplane efficiency in Canada. Our cold weather in particular has special effects on airplane engines, wires and canvas. Prof. Robb, at Edmonton, has been studying the operation of airplane engines at low temperatures, and has considerably reduced the time for getting a cold engine started. Mr. Hughes, of the University of Toronto, has carried out experiments on the strength or streamline wires and other aircraft parts under low temperatures. Mr. Gliddon, of McGill, has carried out investigations of wind channels, including tests on tapered aerofoils and different shapes of wing tips. Prof. McKergow, of McGill, has carried out tests on anti-freeze mixtures suitable for engine cooling. Prof. Bronson, of Halifax, has worked on the action of phragm indicator is more reliable than turbines, and shown that a steel diaphragm indicator is more reliable than the present standard pattern. The Board has had airplane fabric exposed to cold weather in Northern Western places, including Dawson in the Yukon, and has sent samples to the Royal Aircraft establishment in Eng. for comparison with the standard samples of fabric. If airplanes are to be used continuously in Canadian winters, a special type of airplane canvas may have to be used, or else protecting varnish or other material will be specially required. Nearly all the aeronautical research work has been in relation to the effect of exceptionally low temperatures on parts of the machines. Aviators who ascend to 25,000 feet find about the same atmospheric temperatures that we have in winter, but the air there is a dry cold, whereas the bane of airplane operation in the middle of our Canadian winters is the frequency of driving dampness combined with cold.

Statistics of 1921. The average Canadian may be inclined to believe that airplane development is at a stand still in Canada. The once familiar hum of the great man-made birds is seldom heard. The number of private air pilot licenses in force at the end of 1921 was 52; of commercial air pilots, 61; of air engineers, 179 of air navigators, 1. There were 52 civil aviation machines registered, 33 civil Government machines and 62 Canadian Air Board (military) machines. The number of civil aviation harbors licensed was 24;

## HOW LONG CAN A MAN EXIST WITHOUT SLEEP?

The longest period of complete and continuous insomnia authentically recorded terminated on the ninth day with the death of the victim, after horrible suffering. Such cases are, however, extremely rare, and can only be due to peculiar diseases. In the ordinary way even the strongest man could not be kept continuously and completely awake for more than ninety hours without great danger to his actual life, and even in this period of time very remarkable changes would occur. Some actual experiments have been undertaken by scientific observers, and hallucinations, abnormal increase of weight, extraordinary decrease in strength, and almost complete loss of memory and concentration occurred. It is to be remembered that the above applied to complete and continuous insomnia, and that even a few minutes' sleep would have refreshed the subjects. The ordinary person who says he hasn't slept for three nights is speaking loosely. After a real insomnia for that length of time he wouldn't be able to speak at all!

## CORRESPONDENCE

Seemingly discussion of matters of public interest is invited under the above heading. As an earnest of good faith and to insure publication, all communications to the editor must be signed by the contributor (nom de plume signature for publication if so desired). The editor of The Times is not responsible for opinions expressed or statements made under above heading; neither does he necessarily endorse or condemn such opinions or statements.

Haying in the Stand Off District is nearly completed except on the Blood Reserve, where they are putting up a large amount of hay. The rye is cut and the Hutterite Brethren have harvesting in full swing. There will be in the neighborhood of forty thousand bushels to haul to Macleod from between the Waterton and Belly Rivers, and I pity the poor farmer that has to haul his grain over such roads. It is eighteen and a half miles to the Hutterite colony and some of the farmers have to haul 24 miles—8 hours on the road and probably the weather away below zero. The road to Stand Off Post Office is in bad shape and there is a bad hill—and after a rain large mud holes appear in the road. People want an airplane to get their mail at times.

There is something wrong—why don't the road councillors spend the money on the roads where the people pay their taxes. I think everyone and I might say most of the people between the two rivers pay their taxes but there has been nothing spent on the roads since 1916—I don't think there has been \$50.00 spent on roads between the two rivers outside of putting the bridge over the Belly River. The road councillors who have any authority on the Stand Off trail should drive a wagon load of grain over this trail to Macleod and it would show them the shape the road is in. It is a shame to have such a road—you cannot pass on the road, it is so rough, and people cannot travel on it.

We used to have a good road but now nothing is done except on the tourist roads which are looked after with a smoothing iron while other roads are left untouched. What is our local member doing about it—we will have to put our retired member back. We would get good roads then. G. PEARSON.

## STRENGTH

comes with PE-RU-NA, just as surely as spring follows winter. Both are the result of Nature's laws—for PE-RU-NA is a natural tonic—a natural laxative—a natural blood purifier and a body-builder.

It builds up the strength because it aids digestion, regulates the bowels, cleans the blood and clears away all catarrhal inflammation. For fifty years and more, PE-RU-NA has brought good health and strength, steady nerves and sound bodies to thousands and thousands of people; and today it is the standard in the home from coast to coast. PE-RU-NA is a perfect tonic laxative—an ideal emergency medicine.

### Here and There

A grain elevator with a capacity of between 30,000 and 40,000 bushels will be erected at De Winton by the Hogg and Lytle Elevator Company.

Work is being pushed on the United Irrigation ditch and five schedules will be furnished next week if all goes well.

Henry Ford has launched upon a new enterprise that of making glass for automobile windshields. It is designed especially for the making of windshields.

A despatch from Hong Kong confirms the report that nearly 40,000 people lost their lives in the recent disastrous typhoon which visited Swatow, 200 miles north of that place.

Peter Warren, of Taber, is through with his grain cutting. The field was ready for the binder 92 days from the time the seed was sown. A number of his neighbors cut about the same time.

Commencing September 15th next the general conference of the Methodist church will be held in the city of Toronto. A total membership of upwards of 450,000 will be reported at that meeting.

Bootleggers doing business on the Detroit river have warned revenue officials to keep their hands off liquor running and many persons of late, suspected of being spies have met death on the river presumably at the hands of these breakers of the law. The police seem unable to stop the traffic.

In the Barrington Essays on Practical Contest just concluded the four prizes were awarded as follows: 1st prize, \$500, P. Swanson, Timmins, Ontario; 2nd prize, \$250, M. Currie, Grand Mira South, Cape Briton; 3rd prize, \$150, Donald C. Oxley, Queen's County, N.B., and 4th prize, \$100, R. M. Brown, Pincher Creek, Alberta.

Proprietors of five weekly newspapers printed in Winnipeg, which have been conducting contests in which cash prizes were given for the most exact forecasts in Saturday baseball games, were arrested recently charged with a violation of the criminal code. They were released on bail. In recent weeks these publications have been distributing \$40,000 a week in prizes, the money having been contributed by the contestants with their forecasts.

A motorist party from New York City passed through Macleod on Tuesday, heading for Calgary and the irrigated district in the vicinity of Basano. They came in by way of Glacier Park, Montana, and had been nearly two months on the trip. They passed through Cardston but did not go through the Mormon temple as they would have liked, that structure not being open to the public at the time they left that point.

Officials high in the public service are striving mightily to effect a settlement between the striking coal miners and employers at an early date, realizing that should the strike continue much longer conditions both in Canada and the United States will be such as to cause untold suffering this coming winter. Even should the mines be re-opened immediately there is bound to be suffering of an aggravated nature.

The whole country is interested in the establishment of equitable conditions for the farmer, whereby he may grow grain at a profit and not at a loss. It is the greatest mistake in the world to suppose that those who are opposed to farmer domination in politics wish to cheat the farmer of his well-earned rewards. Every financier business man and professional man is as deeply concerned in the agricultural prosperity of Canada as the farmers themselves.

Since the first of the month the municipal mixing station in Macleod has turned out a ton and three-quarters of poisoned bait every day, excepting Sundays. This is being used in the extermination of grasshoppers and it is said the insects take to it readily, even when it is scattered in fields of grain rapidly nearing the cutting stage. It was feared the hoppers would destroy the heads of the grain, thus destroying entire crops, but such, luckily, has not been found to be the case.

Premier Taschereau, of Quebec, has been dubbed head bartender of the province of Quebec, by A. Samoe, leader of the opposition. Premier Taschereau says:—"I am willing to assume the title of head bartender of Quebec, provided the Quebec Liquor Act continues to act satisfactorily and the revenues derived by the government from its operation are applied as now to further the cause of education to combat tuberculosis, aid agriculture being open to the public at the early hour they left that place.

The great herd of buffalo at Wainwright, Alberta, has increased to 6,146 head. The natural increase last year was 1,075, the decrease due to fighting, old age and slaughtering was 81, giving a net increase of 994. Thirteen years ago the nucleus of this herd was 700 purchased from Michael Pablo, of Montana. Since that time the buffalo have grown to eight and one-half times their original number. To-day Canada possesses three-fifths of the American bison in the world with an estimated valuation of nearly \$2,000,000. The disposal of a number of the male buffaloes which exceed herd purposes by about 1000 head, is at present engaging the attention of the department.

## Wheat Board Is Abandoned

CALGARY, Aug. 15. — Premiers Greenfield and Dunning last night formally announced that they had decided to abandon the wheat board and so informed the federal government. This action was taken after the decision of John McFarland and J. R. Murray not to accept the positions of chairman and vice-chairman of the board, which was made last night.

"After endeavoring for more than two weeks to secure suitable men, we have now concluded that we can go no further and have therefore wired the federal government to that effect," are the concluding words in the statement made by the two premiers.

They complain of opposition of the grain trade to the wheat board. "There is no doubt that the great majority of the grain trade are opposed to the wheat board idea."

In their letters of refusal sent by Messrs. McFarland and Murray, to Premiers Dunning and Greenfield, they said: "The majority of the grain trade is opposed to the operation of the proposed board."

"The board could only succeed in fulfilling the object for which you desire to create it provided that the sympathetic co-operation of the grain trade is assured," they say in their letter.

## Death of Lord Northcliffe

LONDON, Aug. 14. — Viscount Northcliffe, noted British publicist, died this morning.

News of Lord Northcliffe's death was given out by the doctors who have been attending him in the following bulletin:

"Viscount Northcliffe died at 10.12 o'clock. The end was perfectly peaceful."

The death of no other unofficial personage could have made a deeper impression in England than that of Lord Northcliffe. The news was not a surprise, as the bulletins issued by the doctors for the last week plainly indicated that their patient was dying. The nature of the fatal disease had not yet been revealed, but it is expected that the public will soon be told.

Lord Northcliffe was by far the greatest figure in British journalism, and the first question on everyone's lips was as to what effect his death will have on the policy of The Times and his other newspapers, which since the end of the war have strongly opposed the Lloyd George administration and its principles with the notable exception of its dealings with Ireland, which the Northcliffe press supported throughout.

The medical terms used in giving the cause of Lord Northcliffe's death were ulcerative endocarditis, streptococcal septicaemia and terminal syncope.

## An Extended Hike.

Miss Barbara Druss and Francis E. Nebet, two young lady hikers, arrived in town on Sunday of this week and were guests at the Queen's Hotel. The girls' starting point had been New York City and they have been on the trail for almost a year. The wayfarers were willing to be interviewed and their conversation was most interesting. They had received the very kindest treatment and consideration from people everywhere along the route of travel and had never been molested in the slightest degree. The only equipment each carried was a small knapsack. They appeared to be well supplied with money, good looks and intelligence. They are the joint writers of a book soon to be published. The young ladies were clothed in garments suitable to the long and arduous trip they will complete when they reach Banff, where they will take Pullman for St. Paul. They will finish up their tour by walking on to New York City, their starting point. Their journey carried them over long and sometimes uninhabited stretches of prairie, mountains and forests, where for hours at a time a human face was not met with. Swift running rivers had to be crossed and all in all their trip has been full of interest and adventure. They have enjoyed the very best of health while on the trip. The lip-stick and powder puff did not appear to be a part of the equipment carried by them.

## FARMERS' PICNIC.

A Farmers' Picnic will be held at the Provincial School of Agriculture, Claresholm, on Friday, August 18th, to which all those of the district are cordially invited. At 2 p.m. an opportunity will be given to everyone to inspect the Experimental work, and those in charge will make a detailed explanation of the various experiments. The following men will be present and will complete the afternoon's program:—H. A. Craig, Deputy Minister of Agriculture; S. G. Carlyle, Live Stock Commissioner; D. Douglas, Supervisor of Farms; F. S. Grisdale, Principal of Olds School of Agriculture; W. J. Stephen, Field Crop Commissioner.

All are invited to bring basket lunches: tea and coffee will be served at the school. The department of Agriculture is especially anxious that everyone connected with agriculture make a special effort to attend and help make the event both profitable and enjoyable.

Head line:—"What is the value of birds?" Don't know but the cost of some birdies on the golf links is considerable.

Don't Do This!

#### QUEENSLAND ABOLISHES ITS SECOND CHAMBER.

Queensland has the distinction of being the first self-governing sovereign state in the British Empire to try the experiment of a single chamber, its long fight to do away with the Legislative Council, which corresponded with our Senate, having been crowned with success a short time ago. The final decision was left to the British Government, since the Governor of Queensland felt that the matter was too important for him to decide, and the decision of the Government was communicated in the following statement by Winston Churchill, the Colonial Secretary:—

"After careful examination of all the circumstances, I cannot but regard the matter with which the bill deals as essentially one for determination locally. The policy of the bill being on this view one of purely local concern, it would not be in accordance with established constitutional principles that His Majesty's advisers should intervene to prevent the bill from becoming operative. I have had accordingly no alternative but to advise His Majesty to assent to the bill."

#### The Fortress of Privilege.

Queensland became a self-governing colony in 1859. The Government consisted of a Governor appointed by the British Government, an elective Legislative Assembly and a Legislative Council. The latter was appointed nominally by the Governor, but actually by the Queensland Government. Either through a flaw or intentionally the number of Legislative Councillors was not specified, and there was nothing to prevent the Governor appointing a thousand of them if he so desired. The Council had much the same powers as the Canadian Senate, and if it were hostile to the Government of the day, could bring to naught practically all its legislation except money bills. The Councillors were appointed for life, and, though they were paid no salary, they had free transportation on the railroads, the usual Parliamentary privileges, and were entitled to the prefix "Honorable." The practice was to appoint to the Council men of large affairs, and the critics of the Council assert that in time it became a little fortress of all the interests in Queensland, except the well-known public interest.

#### Fight With Labor.

When the Socialist and Labor craze seized Australia some years ago, the Council came into serious conflict with the Lower House for the first time. Before that the Council had discharged its duties in more or less perfunctory fashion, but it suddenly awakened to the fact that there was its great opportunity to show that it had original ideas and was no mere echo of the Assembly. It began to reject or amend beyond recognition various bills that the Assembly sent on to it, and thus did a great deal to keep Queensland legislation sane and reasonable, in the view of its supporters, or to thwart the will of the people and throw itself in the path of progress, according to its enemies. It became clear to the Labor Government that unless it could get control of the Council it would be unable to carry out the program upon which it had been elected, so, taking advantage of the clause which permitted the Governor to appoint an unlimited number of councillors, it nominated a crowd of its own supporters for the Council and called upon the Governor, Sir Hamilton Gold-Adams, to get busy and appoint them.

#### The Governor Balks.

But Sir Hamilton refused. The moment, but began an agitation for the abolition of the Council, and even held a referendum on the question. Much to its surprise, the voters decided that they did not want to abolish the Council. However, the "blind Furies," with their abhorred shears, helped solve the problem, and as death removed a member of the Council, the Labor Government appointed a Labor sympathizer, who was pledged to vote for the abolition of the Council when the opportunity presented itself. But the Labor party been depending on this alone it would be some time in the future before it would have had a clear majority in the Upper House, since the Queenslanders are long lived, and a member of the Legislative Council who passes away before he is 75 years old is considered to have been cut off in his prime. The retirement of Sir Hamilton Gold-Adams presented an opportunity that the Government was not slow to seize.

#### Turning the Trick.

It had already informed the British Government that, since the King was fully represented in Australia by the Governor-General of the Commonwealth, it was not desirable that the separate states should also have governors, who were not even natives, as is the case with Lieutenant-Governors in Canada, and who constitute a burden upon the taxpayer. It was on this account that the post was not immediately filled, and in the interval the duties of Governor were discharged by the Lieutenant-Governor, who was an appointee of the Labor Government. So with the Lieutenant-Governor, Mr. Lennon, in the saddle, the Government renewed its proposal to appoint enough Labor members to the Council to vote it out of existence. A bill to this effect was introduced and carried through both Houses. Before it could become operative, however, a new Governor was appointed from England, for the argument that a Governor was unnecessary had not been heeded. As remarked, he would not take the responsibility of giving assent to the bill, and forwarded it to London, where it was approved by the King.

#### UTILIZING NATIVE FRUITS.

It is difficult to secure imported berries and tender fruits in first-class condition at our prairie markets. Not only is the quality below first grade, but the fruit is usually obtainable only at high prices. These conditions are prompting people to set out home fruit plantations of berries and hardy tree fruits. While waiting for these plants, bushes, and trees to reach the stage of heavy bearing, it is profitable to accept the bounty of the native plants which bear edible fruits.

The Redman of the Canadian plains knew the value of native fruits, and not only used them freely when ripe, but were in the habit of drying certain kinds to give a supply during the winter. Among the fruits eaten raw

when ripe, and which were also dried for later use, are, raspberry, currant, gooseberry, plum, sand cherry, choke cherry, pin cherry, grape, Saskatoon berry, and buffalo berry. The strawberry is juicy and was gathered for immediate use. The nannyberry was eaten while fresh, as was also its cousin, the penbina, or "highbush cranberry." The hazel was used raw and in some cooking. The hawberry and choke cherry acted as flavors in the preparation of some meats. It seems that the fruit of the rose and the red haw was seldom gathered except at times of scarcity of the more appetizing types.

The curing of the various fruits was chiefly by sun drying. Plums were often pitted before drying. The cherries were pounded into a pulp in an elm-wood mortar, or ground on a rock, then the resulting paste was made into cakes for drying. The Saskatoon berries and raspberries dry readily.

White settlers have a variety of methods of handling wild fruits. Among them are—canning, preserving, drying, pickling, making sauce, jam, jelly, and catsup. Soda is commonly added to astringent plums when these are being canned or preserved.

Jelly may be made from the juices of any of the native fruits. Some of these fruits have juice which contains but little pectin, but, additional pectin may be had from the white part of the peel or orange of grape fruit, or by adding the juice of such fruit as the red currant, or pin cherry. Where pectin is likely to be needed later in the season the juice of the red currant or red cherry may easily be kept fresh by sealing the juice, without sugar, in sterilized jars.

The juice of most crab apples is well adapted for mixing with other fruit juices in order to secure a jelly of good consistency. Transcendent crab apple juice added to choke cherry juice produces a mixture which can be made into a pleasing jelly. The juice of the penbina may be readily made into jelly. Although many people do not

care greatly for this jelly, the prairie pioneers were wont to rely upon it for their main supply. Red currant juice is frequently mixed with that of the red raspberry for jelly making.

Some fruits which are rather insipid, or flat in taste, when cooked, such as the Saskatoon berry, may have merrisprightly fruit, such as strawberries or rhubarb, added.

One very palatable jam is made by cooking crab apples and good quality native plums until soft, and then putting both kinds through the colander. There are many combinations possible, as well as a number of ways of preserving each kind of fruit alone. It is likely that your neighbors can supply many good suggestions which have been gathered from experience. The native fruits have flavors unlike imported fruit. They have been important in the lives of prairie pioneers, and are worthy of further consideration. When the cultivated fruit plantation is set out it is a good idea to work into the windbreak such trees as Saskatoons, plums, pin cherries, and non-astringent choke-cherries.

The above article is taken from a bulletin issued by W. R. Leslie, Superintendent of the Dominion Experimental Station, Morden, Manitoba, and the information it contains may be depended upon.

A Milwaukee Church has barred women who wear knickerbockers. Is this a slap at the knee plus ultra?

The unbalanced flapper returned from the library the other day with "The Brimming Cup" in one hand and "The Empty Sack" in the other.

"Neckwear Removed"—says a departmental store sign. That's right, make yourselves at home—so long as you stay within the law.

It is said that Oswald Garrison Villard, former owner of the New York "Post," has picked the colored "pug"

Dempsey. Villard also backed the Germans to win the war.

#### MY KITTY ADARE.

At the fair of Killarney was Kitty Adare,  
Fresh and fair as a rose in the morning,  
And she danced o'er the grass for the folks gathered there,  
With a shamrock her fair hair adorning,  
I said, "Pretty Kitty, 'tis you that I love,"  
That day at the fair of Killarney.

She stole softly near me did Kitty Adare,  
While the air was all filled with a fragrance so sweet,  
Methought, Was there ever a woman so fair,  
From her beautiful hair to her small dainty feet?

"Sweet Kitty," I whispered, "come loved one to me,"  
That day at the fair of Killarney.

All the boys in the county loved Kitty Adare,  
Not a bit was I jealous, she being so fair,  
But I knew that all Kitty's sweet love was for me,  
For she shyly had told me one night by the sea,

And that's why my heart was so happy and light,  
That day at the fair of Killarney.

I went to get married with Kitty Adare,  
A crown of wild flowers her fair head adorning,  
Her lips were as red as a rose in full bloom,  
And her eyes were as bright as the skies in the morning,

And she danced as she never had danced at the fair,  
On our honeymoon morn at Killarney.  
—Robert Cecil Moxley,  
Ottawa, July 17.

## Ladies

HOW ABOUT A NICE ELECTRIC FAN THESE WARM DAYS?

AN ELECTRIC WASHING MACHINE IS ALSO VERY NICE.

THEN BESIDES THESE THERE ARE TOASTERS, PERCOLATORS, VACUUM CLEANERS, ALL OF WHICH MAKE LIFE MORE PLEASANT FOR THE BUSY HOUSEWIFE.

### Macleod Municipal Electric Department

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that A. T. Leather of Macleod has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz., between Sections 33-9-25 and Section 4-10-25 W. of 4th Meridian.

Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice.

Dated at Macleod 17th August, 1922.  
A. T. LEATHER,  
Applicant.

## To Holders of Five Year 5½ per cent Canada's Victory Bonds

Issued in 1917 and Maturing 1st December, 1922.

### CONVERSION PROPOSALS

THE MINISTER OF FINANCE offers to holders of these bonds who desire to continue their investment in Dominion of Canada securities the privilege of exchanging the maturing bonds for new bonds bearing 5½ per cent interest, payable half yearly, of either of the following classes:—

- Five year bonds, dated 1st November, 1922, to mature 1st November, 1927.
- Ten year bonds, dated 1st November, 1922, to mature 1st November, 1932.

While the maturing bonds will carry interest to 1st December, 1922, the new bonds will commence to earn interest from 1st November, 1922, GIVING A BONUS OF A FULL MONTH'S INTEREST TO THOSE AVAILING THEMSELVES OF THE CONVERSION PRIVILEGE.

This offer is made to holders of the maturing bonds and is not open to other investors. The bonds to be issued under this proposal will be substantially of the same character as those which are maturing, except that the exemption from taxation does not apply to the new issue.

Dated at Ottawa, 8th August, 1922.

Holders of the maturing bonds who wish to avail themselves of this conversion privilege should take their bonds AS EARLY AS POSSIBLE, BUT NOT LATER THAN SEPTEMBER 30th, to a Branch of any Chartered Bank in Canada and receive in exchange an official receipt for the bonds surrendered, containing an undertaking to deliver the corresponding bonds of the new issue.

Holders of maturing fully registered bonds, interest payable by cheque from Ottawa, will receive their December 1 interest cheque as usual. Holders of coupon bonds will detach and retain the last unmatured coupon before surrendering the bond itself for conversion purposes.

The surrendered bonds will be forwarded by banks to the Minister of Finance at Ottawa, where they will be exchanged for bonds of the new issue, in fully registered, or coupon registered or coupon bearer form carrying interest payable 1st May and 1st November of each year of the duration of the loan, the first interest payment accruing and payable 1st May, 1923. Bonds of the new issue will be sent to the banks for delivery immediately after the receipt of the surrendered bonds.

The bonds of the maturing issue which are not converted under this proposal will be paid off in cash on the 1st December, 1922.

W. S. FIELDING,  
Minister of Finance.

## LOCAL & PERSONAL

A light shower of rain fell last Tuesday afternoon.

The river at this point is running very low.

Mrs. Frank Thompson and children spent a few days in Monarch last week, returning to Macleod Monday.

G.T.P. debentures rose 12 points on the London market on Saturday last, creating a mild sensation in that city.

Miss Erna Thiel was a visitor to Lethbridge the early part of this week, returning to Macleod on Thursday.

W. J. Ryan and daughter June returned last Saturday from a three weeks visit with relatives living in and around Ottawa, Ontario.

There was a soft snow fall at Waterton Lakes the latter part of last week. The weather conditions for a day or two were far from pleasant.

A large number of binders of the different makes have been disposed of by implement dealers during the past few weeks.

Mr. and Mrs. W. G. Andrews, with Miss Lillan, are spending their summer holidays with Mr. and Mrs. J. J. Haney at Cadillac, Sask.

The community service held under the auspices of the Dominion Chautauqua Service in the large tent last Sunday evening was attended by about 200 persons.

A travelling sign painter left his mark on local places of business during the past week, store windows being much improved in appearance after passing through his hands.

Wild fruits are plentiful in the Porcupine Hills, raspberries and Saskatoon especially so, several berry picking parties from town having been out during the past week.

Auto suggestion is the latest fad in the Old Land for restoring the sick to health. Over on this side of the water auto dodging is an actual and daily necessity if you want to stay alive at all.

Miss Jimmy Thiel visited Pincher Creek this week and took in the Pincher Fair. She returned to Macleod on Thursday, accompanied by Miss May Stafford, who will spend a few days in Macleod as the guest of Miss Thiel.

The fall rye crop all over the province is one of the best ever harvested. A market for the surplus grain has been found in Europe and large shipments will be made upon completion of threshing operations.

The Misses Gladys and Ravilla Bayne who have been visiting with their aunt and uncle, Mr. and Mrs. S. Dillingham, returned to Calgary on Monday. They were accompanied by Miss Clara Dillingham, who will spend a week in Calgary.

Boring operations at Monarch are progressing favorably. The drill is now down to a considerable depth, the shale of which for some time was causing considerable trouble, having been passed. May the company be successful in their search.

Duck shooting opens on the 1st of September. There will be good shooting on nearby lakes is the prediction being made by old duck hunters. The Hungarian partridges, too, are also numerous, many coveys of young birds already strong on the wing, being noticed in the vicinity of town.

A more entrancing story for boys was never written than Jules Verne's gripping story "20,000 Leagues Under the Sea." The sights met with, the desperate encounters with marine monsters kept the red-blooded boy in a fever of excitement from cover to cover of that interesting drama of the sea. For two nights this week "20,000 Leagues Under the Sea" has been a drawing feature at the Empress, a goodly number being in attendance both nights despite the fact that a Chautauqua entertainment was also on the boards. The pictures shown were very realistic and wonderful, the marine growths screened being especially interesting. Taken all in all the

### Delta Pearls

are made by a famous French firm, Heller Bros., and are absolutely guaranteed to wear and hold their lustre. We have them in stock at prices ranging from \$12.50 for an 18 inch string. A pretty 18 inch length with a diamond set white gold clasp for \$21.00. (Prices are set.)

**John T. Doney**  
JEWELER AND OPTICIAN

pictures shown were well worth the price of admission.

Mr. Jas. Ringland is spending a few days in Lethbridge on business.

Born—to Mr. and Mrs. P. A. McFarquhar, at Macleod Hospital, on Wednesday, August 2nd, a daughter.

Wheat cutting has commenced at the Hutterite colony near Stand Off, and promises to yield high.

Miss Jessie Grant, of Calgary, visited friends in Macleod during the past week.

Mayor Fawcett, with Mrs. Fawcett and Miss May returned on Wednesday from a vacation trip spent at Banff.

Mrs. J. T. Marks and Mrs. N. Grier, accompanied by Master Norval Marks, are absent on a holiday trip being spent at British Columbia points.

The Hutterite Brethren have been hauling wheat of the 1921 crop to the elevator here during the past few days.

Hay is coming in in considerable quantities and is commanding \$35.00 per ton. It is a mixture of timothy and alfalfa.

Mrs. D. Hayes, of Lethbridge, returned to her home last Monday after spending a few days in Macleod as the guest of Mr. and Mrs. Jas. Ringland.

Several tourist parties from Washington passed through town last week headed for North Battleford, Sask. They were looking for land and expected to locate in that locality.

The Stewart Bros., of Pearce, have 400 acres of wheat of the Marquis variety. Cutting was started on Tuesday and the yield promises to be extra good.

Messrs. Wesley Shields and J. Lambert motored up to Banff on Monday of this week, where they will spend the next ten days revelling in the scenic beauties of that noted resort.

Those of our townspeople who wish to have their names added to the list of subscribers to the Memorial Monument Fund are requested to leave their contributions with the manager of the Union Bank.

The British cabinet unanimously accorded its full support to Prime Minister Lloyd George with regard to negotiations concerning a moratorium for Germany and decided to leave the matter entirely in his hands.

A decoration of the graves of deceased members of the I.O.O.F. will be held on Sunday afternoon, August 27th, at 3 o'clock. Members of the order are requested to bring flowers where possible.

It is a remarkable fact that a goodly proportion of the births that have been recorded during the past few months have been girls. During the war there was a preponderance of boys born. Can anyone explain the why and wherefore of this?

The fall fairs held all over the province have been most successful. The exhibits in all classes were splendid, while the attendance was far ahead of past years. The larger town fairs were failures from a financial standpoint, so it is stated.

Messrs. Winters, Sutherland and Hamilton have returned from a fishing outing spent in the vicinity of the North Fork. As is usual, all the larger fish made good their escape, but smaller ones in sufficient number were brought back to gladden the hearts of the friends of the nimrods mentioned.

Runaway accidents were a feature of Monday's doings, a team hooked up to a water tank ran amuck, leaving the tank near the cemetery, an elderly couple got thrown from a rig, receiving rather serious injuries, the pole of the democrat being broken, while a dog frightened the horse in another instance, causing a bad mix-up.

The largest consignment of binder twine ever shipped from Belfast to Canada or any other country, recently arrived on board the S.S. "Canadian Aviator," which was specially chartered to bring it overseas. The consignment consisted of 1,350 tons in all and was purchased by the U.F.O. co-operatives.

While the Miller outfit was threshing rye on the farm of J. H. McTavish, near Wilson Siding, the straw stack caught fire in some unknown manner, and was soon a mass of flames. By quick work the separator was pulled out safely. A grain bin containing several hundred bushels of rye alongside the separator was saved by great efforts of the crew and neighbors.

W. J. Reid was the first farmer in this district to cut wheat. This he did on Friday, August 11th, 1922. On Monday he was busy with two binders in a field that will give over 30 bushels to the acre. Mr. Reid says he has an average crop for Macleod district, but not up to the big crops of past years. "I will have plenty of feed, and some to ship north if they need it up there," he says.

It is said fully 10,000 people turned out to attend the circus performance given in Lethbridge on Wednesday of this week. The performance is stated was clean and wholesome, the trapeze work of a very high standard of excellence, while the collection of wild animals would be hard to duplicate in any country. This great aggregation pulled through Macleod in three sections at about 10 o'clock the same evening, two locomotives being attached to each section. Their next stop-over was at Cranbrook where they exhibited today, passing from

there into the States, where they are billed to appear in all the large centers.

Conditions are far from being satisfactory in Ireland at the present time.

A bunch of northern grown stock arrived at the C.P.R. stockyards at this point last week.

Mrs. Ferguson and the Misses Vera and Ada Benson motored to Lethbridge for the week-end.

Mr. and Mrs. Trenholme Dickson are visiting friends in Macleod this week.

The end of August will likely see a decided falling off in the number of tourists and camping parties visiting Waterton Lakes Park.

A gentleman representing a Seattle capitalist arrived in Macleod last week to look over the situation here on behalf of his client.

The Service Garage, located on 23rd Street and 3rd Avenue, has had its place of business decorated with two signs which can be read a block away.

George Pearson, of Standoff, has a good looking field of fall rye on his farm. He aims to sow 75 acres of that grain this fall, planting it as early as possible.

G. R. Johnston, manager of the Bank of Montreal at Macleod, accompanied by Mrs. Johnston, left today (Thursday) for a vacation outing at Calgary and Waterton Lakes.

The Detroit Free Press says: "It's all right for people to stand by and tell what they'd do if the flapper were their daughter, but only fathers and mothers know what it means to try to argue with a flapper."

The old poles on the abandoned line in town are being removed. As campers are a little shy of wood at times the butt ends of these poles might be left at the camp site to the advantage of such people. What say?

J. H. Robinson, of Edmonton, arrived in Macleod Wednesday and will act as manager of The Bank of Montreal branch here during the absence of manager G. R. Johnston on summer vacation.

Mildred, eldest daughter of Mr. and Mrs. S. Bailey, had the misfortune to fall and break an arm while the family were out at Waterton Lakes. The little patient was hurried to Macleod where the arm received attention. She is now progressing favorably.

Trainloads of cattle are being shipped weekly from drought-stricken northern areas to more favored locations in this southern country. This wholesale removal of cattle is said to be responsible for the falling-off in the price of live stock which has been very pronounced of late.

It is rumored that "A" Battery, Winnipeg, consisting of 100 men and ninety horses with artillery equipment, will be permanently stationed at Macleod in the R.C.M.P. barracks. In case of this eventuality this point will be a military training school for officers.

Charles Hyssop, an old-timer of the Lethbridge District, is dead at the age of 59 years. He had resided in Lethbridge for nearly 35 years. His wife predeceased him by about two months. The funeral was held on Monday, the Oddfellows of which the deceased was a member attending in a body.

Hungarian partridges, a few brace of which were turned loose in the neighborhood of High River some eight or ten years ago, and which have multiplied surprisingly and scattered all over southern Alberta since then, are said to be driving the prairie chicken from its accustomed haunts to more secluded spots as yet unvisited by this foreign game bird.

Mr. and Mrs. Hobbs, who live south of town, met with a slight mishap upon making ready to return to their home on Monday, the horse they were driving kicking Mr. Hobbs on the cheek-bone, inflicting a nasty cut. Mrs. Hobbs sustained a bad cut on the back of the head and several severe bruises. The unfortunate sufferers were taken to a nearby surgery where their hurts were attended to.

Mr. and Mrs. J. A. Macdonald and family leave for Vancouver, B.C., today, in which city they will take up residence. Mr. Macdonald is an ex-Mounted Policeman having served continuously in the force since 1882, and being retired quite recently from active service when the reduction in the strength was made. The many friends of Mr. and Mrs. Macdonald wish them

much happiness in their new place of abode.

Among the Macleod visitors seen in Lethbridge yesterday (Wednesday) were Mr. and Mrs. Arthur Young, Miss Olive Young, Miss E. Ferguson, Mr. Wilson Young, Mr. and Mrs. J. Gillespie, Miss A. Busby, Mrs. E. Morrison, Misses R. and E. Thiel, Mr. Cox, Miss Wilma Swinerton, Mr. H. Miles, Mr. L. Headenstrom, Misses Helen and Veronica Parker, Miss Margaret McCartin and Mr. W. Davis (Clareholm). There were probably a great many more who were not run across by us.

On Monday evening last the Parish Hall of Christ Church was the scene of a very enjoyable informal dance given by "The Macleod Follies," about fifty young people being present. The dance commenced at about eight o'clock and by nine was in full swing. A novel feature of the evening was the program of dances, which, in addition to the regular dances, had listed what was called "Automobile," "Jolly Miller" and "Grand Old Duke of York," three items which added greatly to the enjoyment of the evening.

At about midnight a dainty lunch was served, after which dancing was resumed, the second dance after lunch, called "Follies Dance," being a confetti one-step. The dance broke up at half past one, when the young people wended their way homeward, all voting it a most enjoyable evening. The pianist was Miss F. Nichols, who was relieved at intervals by several of the girls present. Among those present were Misses Florence Bachila, Wilma Swinerton, Margaret Shield, Erna Thiel, Miss Wall, Stasia Wall, Frances Wall, Loretta Wall, Mary DeMarre, Gertrude Genge, Dolly Genge, Nancy Robb, Winnie Reach, Cora Hicks, Dorothy Armour, Nellie Drinkwater, Lillie Hicks, Olive Lambert, Alice Beatty, Alberta McGree, Mrs. Galbraith, Mrs. Hicks, Mrs. Robb, Mrs. J. W. McDonald, and Messrs. J. W. McDonald, M. Mackin, J. Dillingham, L. Fraser, M. Mackin, L. Headenstrom, H. Miles, N. Genge, M. Genge, C. Storey, A. Storey, T. W. Whitefoot, J. Reynolds, N. Neilson, R. Parkinson, T. Clarke, Alex. Hart, C. Keats and Frank Lyons.
